PRASEN S SHINDE

Pune , Maharashtra | prasenshinde8@gmail.com | 8237875696 | **Github** | **Linkedin** | **Portfolio**

Education

Vishwakrama Institute of Information Technology
Bachelor of Engineering (Computer Science) | CGPA: 8.56

Expected Graduation :
June 2027

Skills

- **Frontend :** React.js, React Native , Next.js , GSAP, Tailwind CSS.
- **Backend :** Node.js, Express.js , REST API , prisma .
- **Languages :** Java , Python , JavaScript
- **Databases :** MySQL, PostgreSQL, MongoDB, Firebase , DBMS Fundamentals.
- **Tools :** Git, GitHub, Postman , Canva , Figma , Jira , LLMs.
- **AI/ML/Libraries :** Basic Machine Learning , Pandas, NumPy, Matplotlib.

Professional Experience & PROJECTS

App Developer Intern at Sankalp

- Developed 2 production-ready full-stack cross-platform mobile applications using React Native, Express.js, PostgreSQL, and Prisma, building scalable REST APIs and responsive mobile experiences.
- Built an OTT streaming platform with adaptive HLS video streaming (360p–1080p), live streaming, secure signed URL access, Dockerized microservices, and role-based access control (RBAC) for admin functionality.
- Implemented key user-facing features including subscription management, Integrated Cashfree and Paystack payment gateways , virtual coin-based content unlocking, reels/shorts, coursework modules, and daily rewards to improve user engagement , JWT authentication plus OAuth .
- Built an EdTech platform with course management, video lectures, assignments, quizzes, study materials, user authentication, and an admin panel for managing educational content and teacher management module , student enrollment.

Web Developer Intern at Tellis

- Developed and deployed full-stack features using Next.js, TypeScript, Express, and MongoDB, improving application performance and scalability.
- Integrated Firebase services (authentication, cloud storage, and real-time database) to enhance user experience and security.

Pixel64 | Real-Time Multiplayer Chess Platform

- Built a real-time multiplayer chess platform using React.js (Vite), Node.js, Express, Socket.IO, PostgreSQL (Prisma), and Redis, enabling seamless matchmaking and synchronized gameplay with low latency.
- Implemented server-authoritative game logic with chess.js, including legal move validation, move history persistence in Redis , automatic color assignment, and real-time board synchronization across clients.
- Designed a scalable backend architecture featuring WebSocket-based communication, matchmaking queues, unique game room management, JWT authentication, and persistent game state storage to support concurrent multiplayer sessions.

Mini Projects and Contributions

- RouteCraft
- EduQuest
- NurtureNest
- Sahay

Positions of Responsibility

- *Joint*-Technical Head at Code-Chef

ACHIEVEMENTS

- **2X Techkathon Winner (National Level Hackathon)** conducted by AISSMS College. We won 1st prize in individual problem statement among 200+ Teams.
- **Pulzion Hackathon Winner** (web dev hackathon conducted at PICT, We were Runner-upin web domain.)
