PRASEN S SHINDE

Pune , Maharashtra | prasenshinde8@gmail.com | 8237875696 | Github | Linkedin | Portfolio

Technical Skills

Programming Languages: Java , Python, JavaScript
Frontend: HTML5, CSS3, React.js, Next.js, Redux, Tailwind CSS, GSAP, React Native
Backend: Node.js, Express.js , REST APIs, Prisma
Databases: PostgreSQL, MongoDB, MySQL, Firebase
Machine Learning & Libraries: Basic Machine Learning , Pandas, NumPy, Matplotlib, Hugging Face, RAG
Cloud & DevOps: Docker, AWS, Git, Vercel, Netlify, Render
Tools: GitHub, Postman , MinIO, Canva, Figma , Jira , LLMs.

Experience

Software Developer Intern | Sankalp — April 2026– Sept 2026
Duration: 6 months

- Engineered a production-ready OTT streaming platform supporting authentication, subscriptions, watch history, and adaptive video streaming for a seamless user experience.
- Designed a distributed video processing pipeline using FFmpeg, worker services, and MinIO, enabling automated multi-bitrate transcoding and scalable media storage.
- Implemented RESTful APIs using Node.js and Express.js to support authentication, streaming, subscriptions, and content management.

Web Developer Intern | Tellis — June 2025– July 2025
Duration: 1 months

- Developed and deployed full-stack features using Next.js, TypeScript, Express, and MongoDB, improving application performance and scalability.
- Integrated Firebase services (authentication, cloud storage, and real-time database) to enhance user experience and security.
- Developed a UI component library and an internal ERP system to streamline the company's operations and workflows

Industry Project

SOP for CAD Automation | Atlas Copco — February 2026 – Present

- Automated CAD component integration by matching new parts with existing machine assembly interfaces.
- Implemented compatibility checks, interference validation, and automated change reporting.
- Developed a graph-diff approach to detect added, removed, and modified components in CAD assemblies.

Projects

Pixel64 — real-time multiplayer chess platform
Tech Stack: React.js, Node.js, Express.js, Socket.IO, PostgreSQL, Prisma, Redis, chess.js

- Developed a real-time multiplayer chess platform with seamless matchmaking and low-latency gameplay.
- Implemented server-authoritative game logic with legal move validation, move history, and real-time board synchronization.
- Built scalable matchmaking, game room management, JWT authentication, and persistent game state for concurrent multiplayer sessions.

PulseIQ — AI-Powered Predictive Health Intelligence System
Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, RAG, LLM, AI/ML, Google Fit

- Developed an AI-powered healthcare platform integrating Medical RAG, LLMs, and wearable health data for personalized disease-risk prediction.
- Designed a Digital Twin architecture with secure patient records, conversational AI, and real-time health analytics.
- Integrated smartwatch telemetry as contextual memory to deliver personalized recommendations and longitudinal health insights.

Mini Projects & Contributions

RouteCraft **EduQuest** **NurtureNest** **Sahay**

Achievements

- Winner – Techkathon 2026 (National Level, AISSMS) 400+ Teams
- Winner – Techkathon 2025 (National Level, AISSMS) 300+ Teams
- Runner-Up – Pulzion 2025 (PICT)
- 2nd Runner-Up – I2IC Internal Hackathon 2025 (VIIT) 200+ Teams

Education

Vishwakrama Institute of Information Technology
Bachelor of Engineering (Computer Science) | CGPA: 8.56

Expected Graduation : June 2027
